 PrepaTec Departamento de ciencias PrepaTec Toluca Tecnológico de Monterrey	Energy & Transformation PC 6046 Grupo:	Professor: Alejandro Portales
	Partial Exam	February 16, 2022
	Name:	
	ID:	
	D	
	Points	

1) Find the angles and magnitude of the following vector

$$A = (26, -35, 25) \quad \|A\| = 50.25$$

$$\theta_x = 58.84^\circ$$

$$\theta_y = 134.14^\circ$$

$$\theta_z = 60.16^\circ$$

2) Find the cross and dot product of the following two vectors.

$$A = (9, 6, -7) \quad B = (-6, 7, 9)$$

$$A \times B = \begin{vmatrix} \hat{i} & \hat{j} & \hat{k} \\ 9 & 6 & -7 \\ -6 & 7 & 9 \end{vmatrix} = 99\hat{k} - 103\hat{i} - 39\hat{j}$$

$$A \cdot B = -75$$

$$\hat{i} = 103\hat{i}$$

$$\hat{j} = -39\hat{j}$$

$$\hat{k} = 99\hat{k}$$

3) Find the angle between the two given vectors

$$A = (6, 7, -15) \quad B = (6, -17, 9)$$

$$A \cdot B = -218$$

$$\angle AOB = 127.91^\circ$$

$$\angle AB = 52.08^\circ$$

- 4) Draw the complete FBD for the the following exercise, showing the resultant forces made by the distributed force, and the reaction force of the two supports (just the vector).

5) If the addition of moments in C = 64 kN*m, and the reaction force in D = 10 kN. How much and with what direction is the resultant force in A?

$$\sum M_C = -64 \text{ kNm}$$

$$-A_y(2) + 10(2) - 48(3) = -64$$

$$-A_y(2) - 124 = -64$$

$$A_y(2) = -60$$

$$A_y = -30 \text{ kN}$$

$$A_y = 30 \text{ kN} \downarrow$$

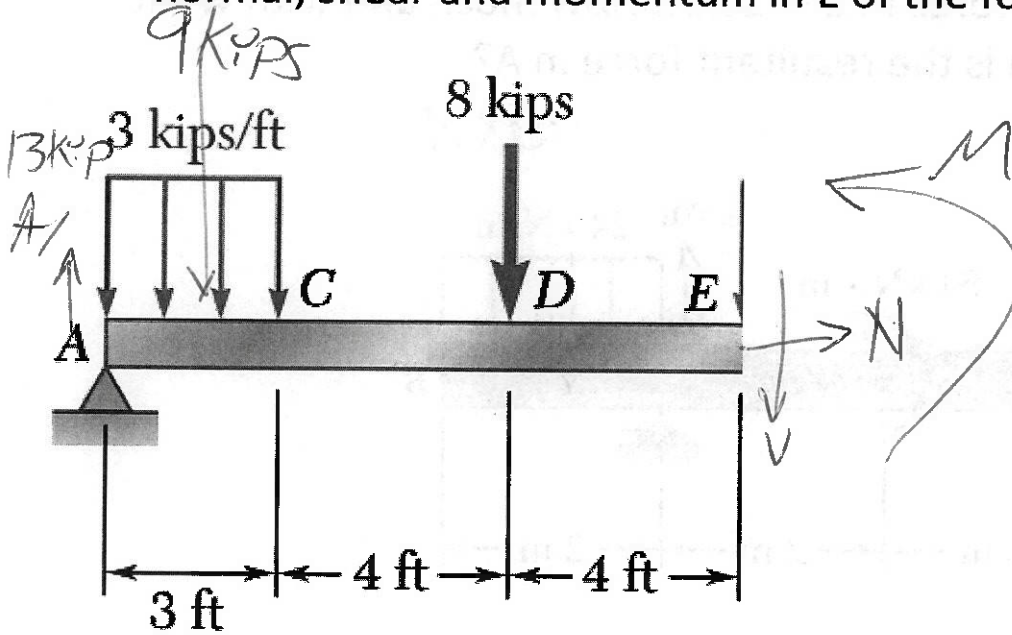

$$-A_y(2) + 10(2) - 48(3) = 64$$

$$-A_y(2) - 124 = 64$$

$$A_y = \frac{188}{2}$$

$$A_y = 94$$

6) Assume the reaction in A is equal to 13kips, calculate normal, shear and momentum in E of the following cut.

$$\sum F_x = 0 \quad \sum F_y = 0$$

$$N = 0 \quad +13 - 9 - 8 - V = 0$$

$$V = -\frac{4}{4} \text{ kips}$$

$$\sum M_E = 0$$

$$M = -25.5 \text{ kNm}$$

$$13(11) + 9(9.5) + 8(4) + M = 0$$

~~$$M = -117.5 \text{ kNm}$$~~

EXTRA (5pts)

7) Calculate the total torque generated to set the ship free according to the figure below

~~100 sin(10)~~

$$100 \cos(10) = 98.48 \text{ m}$$

$$98.48 \text{ m} (5 \times 10^5) = 49.24 \times 10^6 \text{ N}$$
